### Ecocert Certificate

The Ecocert certificate guarantees that the cosmetics contain almost 100% natural and organic active ingredients from organic farming, and the plant extracts are processed with physical methods, without any chemical methods involved. They are wrapped in eco-friendly, recyclable packaging, and the production process is environmentally friendly itself.

### The Aloe Organic series

contains selected natural oils and active ingredients coming from organic farming. The ingredients efficiently soothe skin irritation, slow down skin aging, and have intensive skin hydrating, firming and revitalizing properties. The cosmetic formulas are based on a combination of aloe vera butter and organic aloe vera leaf juice with added fig opuntia extract to rejuvenate the skin.

### Why fig opuntia and aloe vera?

Already the ancient Egyptians used **aloe vera** both for its healing and cosmetic properties. The shine in Cleopatra's eyes is said to have been due to aloe vera eye drops, and queen Nefertiti owed her radiant skin colour to baths in aloe pulp and milk as part of her beauty regimen.

Even before Christopher Columbus discovered America, American Indians used **fig opuntia** for healing and beautifying purposes owing to its antioxidation properties and a wealth of vitamin C, calcium and phosphorus. Fig opuntia extract features 4-in-1 action; it soothes skin irritation, deeply moisturizes and firms the skin, as well as smoothes wrinkles. In combination with pure aloe vera extract, it regenerates the epidermis, nourishes the skin and leaves it looking healthier and younger.

**Aloe vera leaf juice** contains over 70 active substances with a soothing, intense moisturizing and anti-inflammatory effect.

It cleanses the skin, soothes irritations, has antioxidation and astringent properties, as well as restores patency of sebaceous glands.

It contains 10+ microelements including zinc, used i.a. in the treatment of skin with eczema and seborrhea, and magnesium lactate, which inhibits the process of creating histamine in the skin; histamine is responsible i.a. for allergic skin reactions.

**The fig opuntia extract** is rich in organic acids (apple, lactic, amber, wine acids), which support nourishment and regeneration of dry skin.

It also contains a wealth of minerals (calcium, potassium, magnesium, phosphorus) and vitamins (C, B6, thiamine, riboflavin).

One litre of the highest quality fig opuntia oil is made from one million seeds, which are laboriously taken out of 500 kg of fruit in total.

## FACE SERUM

An exceptionally powerful composition of ecological ingredients, with a broad spectrum of activity, which has been designated particularly for the most demanding skin types. Effectively stops the aging process by reducing the wrinkles and stimulating skin's natural regeneration. It fights free radicals, deeply moisturizes and soothes irritations as quickly as 2 hours after application.
